

MultiTransmitter Fibra

Module for integrating third-party wired detectors into an Ajax system

Smart renovation

Build modern complex security based on existing wired equipment. Users get security control via app, data-rich notifications, and automation scenarios. An installer can set up the system in the PRO-app, even remotely. Connect perimeter IR detectors, household gas sensors, thermostats, float sensors, and other third-party devices to straighten security.

18 zones for connecting detectors NO, NC, EOL, 2EOL, 3EOL	Control and setup via app	3 independent 12 V= power lines for fire and intrusion detectors	
Data-rich notifications	Place for 12 V= backup battery 4 or 7 Ah	9 types of wired devices supported	
Energy consumption on the Fibra line up to 100 μ A	Connection via the Fibra line up to 2000 m	Instant detection of wired connection loss (EOL)	
Hassle-free installation QR Code Smart Bracket connecting wired devices App	Two colors	PD 6662 2017	2 GRADE EN 50131
