

FireProtect 2

Heat | Smoke | CO

Wireless fire detector with smoke, temperature, and CO sensors

Accuracy through steam, dust, and time

FireProtect 2 is a next-gen device designed for instant fire detection. The unique smoke chamber does not require regular cleaning, the dual-spectrum sensor distinguishes smoke from steam, the thermistor quickly reacts to the synthetic materials burning, and sophisticated software minimizes false alarms. Everything meets the most modern fire safety standards. Thought-out design, mounting, and the in-app settings make installation straightforward and quick.

Up to 1,700 m of communication distance with an Ajax hub	Jeweller radio communication <ul style="list-style-type: none">• Two-way communication• TDMA• Encryption• Frequency hopping• Power adjustment	Sensors <ul style="list-style-type: none">• Temperature• Smoke• CO
Hassle-free installation	85 dB built-in buzzer	Informative in-app notifications
Dustproof smoke chamber impenetrable for insects	Mounting panel SmartBracket with adjustable rotation angle	Interconnected alarm in 20 seconds
Dual-spectrum optical smoke sensor to filter false alarms	Versions with different battery type Replaceable up to 7 years of battery life Sealed 10 years of battery life
